Lilacs, one year budded, well branched, minimum 3 strong branches from 18 inches up.				
Splendid material for lining out or for potting up,				30 00
Charles X, reddish purple, large individual flowers.				
Hugo Koster, a shade darker than Charles X, a splendid variety for forcing.				
Marie Legraye, single, pure white, very free flowering.				
Madame Lemoine, double white, large individual flowers.				
Souvenir de Louis Spath, dark purple, very large trusses.				
Larger plants, including Michael Buchner and Madame Casimier Perier,				40 00

Lilacs, continued

The following Lilacs are some of the finest, recently introduced ; many of them are only to be found in private collections; well branched plants, 18 inches high :

Per 100, \$100 00

Diderot, single, enormous panicles, 1 foot long, with large claret-purple flowers, very free.

Emile Gentil, double, large panicles of bright cobalt-blue, a very rare shade among Lilacs,

Jean Mace, double, broad, compact panicles, irregular flowers, mauve, fading to bluish, an early and very floriferous variety.

President Fallieres, enormous trusses, very large incurved flowers of pale lilac pink, late flowering, very double.

President Loubet, double, large purple flowers with red buds.

Vestale, single, enormous panicles, large individual flowers, pure white ; a very attractive variety.

Early Lilacs,

Per 100, \$100 00

A cross between one of the early flowering Lilacs and *Syringa Giraldi* ; this latter Lilac has been recently introduced from China and is remarkable for its flowering a week or two before the other sorts. This cross originated a new race of tall growing lilacs, which expand their flowers before those now known.

Berryer, mauve, long trusses of semi-double flowers.

Claude Bernard, double, a rapid growing variety with long trusses of bright mauve-lilac flowers ; very early.

Lamartine, single, beautiful trusses of mauve-pink flowers, showy and very early.

Mirabeau, single, very large mauve flowers, the earliest of all.

Pascal, single, pure lilac, very free.

Vauban, double, regular pale mauve-pink flowers, very free.

Populus volga, a poplar from the Volga river. It grows like a Lombardy poplar and is claimed to be free from canker.

Thrifty plants,	ft. 6- 8	Per 100, \$30 00
	ft 8-10	40 00

Low Budded Roses, a strong, field grown plants, budded very low.

<i>Columbia</i> ,	\$ 30 00	<i>Lady Ashton</i> ,	\$ 30 00

Dwarf Polyantha, (Baby Roses) strong, budded plants,	per 100
<i>Echo</i> , soft, tender pink, very attractive,	\$ 35 00
<i>Ideal</i> , dark, amaranth-red, the darkest of all polyantha,	50 00
<i>Juliana</i> , a distinct orange-pink, has merits for forcing only,	40 00
<i>Koster's Orleans</i> , brilliant scarlet-red, very hardy,	50 00
<i>Rodhatte</i> , large, semi-double flowers, bright cherry-red,	35 00
<i>Rudolph Kluis</i> , clear, bright pink, an improved Ellen Poulsen,	50 00

Climbing Roses, grown on own roots.

Our Climbing roses are very strong plants, each plant has been individually tied to a 6 ft. stake *during growth*. This method secures a thorough ripening of the shoots and makes the forcing varieties exceedingly valuable for florists' use.

<i>American Pillar</i> , great clusters of bright crimson flowers, with a clear white eye, flowering longer than any other variety.	25 00
<i>Excelsa</i> , brilliant scarlet-crimson,	25 00
<i>Purity</i> , decidedly the best white climbing rose, the pure satiny-white flowers are semi-double produced in large clusters,	40 00
<i>Rosarie</i> , a deep pink Tausendschon, a very desirable variety for forcing,	25 00
<i>White Dorothy</i> , great clusters of white flowers,	25 00

Paul's Scarlet Climber, very strong budded plants,

No. 1,	35 00
No. 2,	25 00

Anybody who has seen this rose in flower considers it to be the most brilliant of all roses and the most desirable. The flowers are semi-double, very freely produced in large clusters, the plants being literally covered with bloom. The color of the flowers is a brilliant, vivid scarlet; it is an excellent grower and has dark green glossy foliage, perfectly free from mildew or other diseases. Paul's Scarlet can be forced very successfully, but for this purpose the plants must be grown in pots one season before forcing.

The price on all the roses listed above is the price for No. 1 grade; of some roses we will have a No. 2 grade on which we will be glad to quote you a special price.

Half Standard Roses, stems 21 to 24 inches.

100 00

Excellent plants for Easter forcing, the stems are in exact proportion to the size of the crown when the plants are in flower. They are also very suitable for small gardens and rose gardens. We have a considerable quantity of Orleans and smaller quantities of Ellen Poulsen, Rodhatte and Yvonne Rabier.

Rosa rugosa alba , very strong plants,	ft. 1½ to 2	30 00
	ft. 2 to 3	35 00
Rosa rugosa rubra , very strong plants,	ft. 1½ to 2	25 00
	ft. 2 to 3	30 00

Grafted Roses. The roses we offer in this list have been grafted on very strong stocks of Multiflora japonica or on Mannetti; they were planted in the field in May and will make reasonably strong plants by fall. Some of the varieties we offer are excellent novelties

				Per 100
<i>Elvira Aramayo</i> , H. T., a superb intense vermillion, deeply shaded with old gold on the style of The Queen Alexandra but a shade more cerise. It is a very fine bloomer,				\$ 50 00
<i>Lafayette</i> , a new dwarf Polyantha rose, with very fine crimson flowers; the petals do not drop, and thus lengthen the flowering time. The flowers are produced on long trusses in great quantity, 25 and more on each truss. Always in flower, from May till the frosts,				50 00
<i>General Smuts</i> , H. T., a cross of General McArthur X Mme. Herriot, a strong, erect growing variety with fine, large, glossy foliage, bearing large, nearly double flowers of a peculiar flaming orange-red color. This variety is very hardy, disease resistant and flowers till the frosts,				50 00
<i>Ideal</i> , a dwarf growing Polyantha of great merit, flowers dark amaranth-red, keeping the color well. The flowers are produced in large clusters,				40 00
<i>Koster's Orleans</i> , a Polyantha variety. It is a counterpart of the old Orleans in all save color. This is a brilliant scarlet red; there is no finer variety from a color point of view. Like its parent, it is claimed to be an excellent forcing variety. Very hardy,				30 00
<i>Mme. Alexander Dreux</i> , H. T. Brilliant golden yellow without shading, flowers large, full and of good form, growth vigorous, erect branching, very free,				50 00
<i>Purity</i> , a pure white Climbing rose, blooms with flowers like a white Clematis, a very strong grower,				30 00
<i>Rosarie</i> , a rose of the same habit and growth as Tausendschoen but of a deeper and more even shade of cerise-pink; a strong vigorous grower and free bloomer and an excellent variety for forcing,				25 00
<i>Rudolph Kluis</i> , a clear, bright pink Polyantha, an improved Ellen Poulsen, introduced by the winner of Greta Kluis,				30 00
<i>Silver Moon</i> , hardly needs any description; the pure white, semi-double flowers are four inches and a half in diameter, the petals are of great substance. The large bunch of yellow stamens add to its attractiveness,				20 00
<i>Souv. de George Pernet</i> , H. T., one of the Pernetiana type; one of the most promising bedding roses, flowers of beautiful Oriental-red color, the end of the petals cochineal carmine, shaded with yellow. They are large, full and globular, the oval buds are carried on erect stems. It is a vigorous grower of branching habit, with green foliage; an abundant bloomer,				40 00
<i>Souv. de H. A. Verschuren</i> , H. T. This rose is without any doubt one of the very best roses for cutting and bedding. It is a very good grower, on the style of Jonkheer Mock. It is disease resistant and very hardy; the flower stems are very long and strong, the flowers consequently always stand vertical. The flowers are very well shaped, very double and have an exquisite scent, better than any other rose, which is saying a great deal. Its color is deep golden yellow,				50 00

				per 1000
Bastard Rosa rugosa , strong rooted cuttings for budding or for growing stems,				\$ 40 00

Rosa multiflora japonica.	Seedlings, 2-4 m. m.	\$15	4-6 m. m.	\$20	5-9 m. m.	25 00
	Cuttings, well rooted,					30 00
